CRIME IN MISSOURI

2006

FOREWORD

This publication is produced by the Missouri State Highway Patrol, Statistical Analysis Center. It is intended to provide a basic understanding of Missouri's crime problems, their characteristics, and the law enforcement actions being taken to address these.

The Missouri State Highway Patrol assumed management of Missouri's Uniform Crime Reporting (UCR) Program in 2001. It is the Program's responsibility to collect, maintain, and ensure the integrity of Missouri's UCR crime statistics. In addition, the UCR Program is responsible for reporting monthly crime statistics to the Federal Bureau of Investigation, Uniform Crime Reporting Section. This report is produced annually to document crime activity reported to the program.

I encourage all criminal justice and other public officials to review this publication. If additional research or statistical information services about Missouri's crime or traffic safety problems are needed, please contact our agency's Statistical Analysis Center for assistance.

JAMES F. KEATHLEY, Colonel
Superintendent

ACKNOWLEDGMENT

For the past several years, the Missouri State Highway Patrol, Uniform Crime Reporting (UCR) Program and Statistical Analysis Center (SAC) have worked with a number of agencies to move Missouri from a voluntary to a mandatory crime reporting system as mandated by RSMo 43.505. The Missouri Department of Public Safety led this initiative and their financial support to SAC and the UCR Program is appreciated. The direction and efforts of Laurie Crawford and her staff of the UCR Program are instrumental to its success.

Missouri law enforcement agencies who submit crime and employment information to the UCR Program play a critical role in development of this report. Their participation in the Program is indicative of their desire to improve Missouri's law enforcement information capabilities.

Recognition also is given to the Federal Bureau of Investigation, Uniform Crime Reporting Section and the U.S. Department of Justice, Bureau of Justice Assistance for their guidance during implementation of the Missouri UCR Program. Over the past years, the U.S. Department of Justice, Bureau of Justice Statistics has supported, through grant funds, the Missouri SAC's efforts to provide publications like *Crime in Missouri* and other information services to the Missouri criminal justice community. Their financial support and technical assistance are appreciated.

EXECUTIVE SUMMARY

This Digest is produced annually by the Missouri State Highway Patrol (MSHP), Statistical Analysis Center (SAC). In the past, the primary source of data was law enforcement agencies who voluntarily submitted crime statistics to the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program (UCR). Since only a small percentage of agencies submitted data directly to the FBI's UCR Program, the SAC relied on statistical estimates to measure the extent of crime in Missouri. Beginning in 2001, Missouri's Uniform Crime Reporting Program (UCR) began operation. Statutorily, Missouri law enforcement agencies are required to submit their crime statistics to Missouri's UCR Program. Using these data, the SAC no longer has to rely on statistical estimates. When comparing 2001 and later years' crime statistics to 2000 and prior years, users need to keep in mind two different statistical methods were employed to derive Missouri's crime totals.

The Crime Index is the sum of eight major offenses and is used to measure the magnitude of crime in the United States. Only eight major offenses are included in the Index because of their frequency of occurrence and the fact they are most likely to be reported to law enforcement agencies. These Index offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index.

In 2006, 256,529 Crime Index offenses were reported in the State of Missouri. In 2006, one Index Crime was committed every 2.0 minutes. In 21.1 of every 100 Crime Index offenses, the cases were cleared by arrest or exceptional means.

Violent Crime Index

Violent offenses made up 12.4 percent of the total 2006 Missouri Crime Index. There were 31,801 Violent Index offenses reported in 2006. A violent offense was committed in Missouri every 16.5 minutes. In 47.8 of every 100 Violent Index offenses, the cases were cleared by arrest or exceptional means. A brief analysis of each type of Violent Index offense is given below.

Of the index offenses reported in 2006:

12.4% were violent offenses

One violent crime was committed every 16.5 minutes

- ◆ 383 murders reported in 2006. While murder is the most serious Index offense, it made up only 0.1 percent of the total 2006 Missouri Crime Index. One murder was committed every 22.9 hours. In 63.4 of every 100 murders, the cases were cleared by arrest or exceptional means.

Between 2005 and 2006:

Violent Crime increased 4.8%

→ *Murder decreased 7.0%*

→ *Rape increased 8.4%*

→ *Robbery increased 5.5%*

→ *Aggravated Assault increased 4.9%*

♦ 1,753 forcible rapes reported in 2006. Forcible rape accounted for 0.7 percent of the total 2006 Missouri Crime Index. One forcible rape was committed every 5.0 hours. In 48.3 of every 100 forcible rapes, the cases were cleared by arrest or exceptional means.

♦ 7,551 robberies reported in 2006. Robbery accounted for 2.9 percent of the total 2006 Missouri Crime Index. One robbery occurred every 1.2 hours. In 25.9 of every 100 robberies, the cases were cleared by arrest or exceptional means.

♦ There were 22,114 aggravated assaults reported in 2006. Aggravated assault accounted for 8.6 percent of the total 2006 Missouri Crime Index. One aggravated assault occurred every 23.8 minutes. In 55.0 of every 100 aggravated assaults, the cases were cleared by arrest or exceptional means.

Property Crime Index

Of the index offenses reported in 2006:

87.6% were property offenses

One property crime was committed every 2.3 minutes

Property offenses made up 87.6 percent of the total 2006 Missouri Crime Index. There were 224,728 Property Index offenses reported in 2006. Property offenses accounted for $312,644,213 in property stolen or destroyed. One such offense occurred every 2.3 minutes in the State. In 17.3 of every 100 Property Index offenses, the cases were cleared by arrest or exceptional means. A brief analysis of each type of Property Index offense is given below.

Between 2005 and 2006:

Property Crime decreased 13.5%

→ *Burglary increased 4.6%*

→ *Theft decreased 3.3%*

→ *Motor Vehicle Theft decreased 0.9%*

→ *Arson increased 10.3%*

♦ 44,446 burglaries reported in 2006. Burglary accounted for 17.3 percent of the total 2006 Missouri Crime Index. One burglary occurred every 11.8 minutes and $62,482,304 in property / cash was stolen in 2006 due to this offense. In 15.4 of every 100 burglaries, the cases were cleared by arrest or exceptional means.

♦ 152,964 thefts reported in 2006. Theft accounted for 59.6 percent of the total 2006 Missouri Crime Index. One theft occurred every 3.4 minutes and $92,647,455 in property / cash was stolen in 2006 due to this offense. In 18.5 of every 100 thefts, the cases were cleared by arrest or exceptional means.

♦ 25,287 motor vehicle thefts reported in 2006. Motor vehicle theft accounted for 9.9 percent of the total 2006 Missouri Crime Index. One motor vehicle theft occurred every 20.8 minutes and $132,410,067 in property was stolen in 2006 due to this offense. In

13.2 of every 100 motor vehicle thefts, the cases were cleared by arrest or exceptional means.

♦ 2,031 arsons reported in 2006. Arson accounted for 0.8 percent of the total 2006 Missouri Crime Index. One arson occurred every 4.3 hours and $25,104,387 in property was destroyed due to arson in 2006. In 17.5w of every 100 arsons, the cases were cleared by arrest or exceptional means.

In addition to crime index offense and arrest data, this publication contains data on domestic violence incidents, officers killed or assaulted in the line of duty, and law enforcement employment levels in the State of Missouri.

Domestic Violence

In 2006, law enforcement agencies in Missouri reported 39,916 incidents of domestic violence. In these incidents, 44 were homicides.

44 homicides in 2006 were domestic violence related.

These included:

♦ 9,730 incidents of spousal abuse (includes former spouses).

32.2% of all domestic violence incidents reported in 2006 involved spouses (includes former spouses).

♦ 13,266 incidents between individuals living together or individuals who have lived together in the past.

♦ 6,198 incidents between blood relatives.

♦ 4,202 incidents between couples with child(ren) in common.

Law Enforcement Officers Killed

In 2006, one officer was killed feloniously in the line of duty in the State of Missouri.

In 2006, 1 officer died in the line of duty.

INTRODUCTION

This publication is one in a series prepared by the Missouri State Highway Patrol, Statistical Analysis Center (SAC). It is designed to present data on crime and arrest activity in Missouri from 1997 through 2006 with special emphasis on the most recent year's crime and arrest activity (2006).

The crime and arrest data in this publication are segmented into ten parts. The first section displays the Missouri Crime Clock. This clock offers an overview of the frequency of occurrence of Crime Index offenses committed in the State in relation to time. The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. The eight offenses making up the total Crime Index are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The second section provides data related to Crime Index offenses committed in the State of Missouri. Its purpose is to provide a comparison of the various types of Crime Index offenses so their relative importance can be assessed. In addition, Crime Index activity is displayed by geographical regions of the State and also over time to observe trends. The third section presents data on arrest activity and clearance rates associated with Crime Index offenses as well as arrest activity associated with other classes of criminal offenses. These data provide an appreciation of criminal enforcement activity being performed in the State by class of crime. The fourth section provides a series of data and analysis related to each of the eight types of Crime Index offenses. Data are provided on crime activity, clearance rates, crime patterns, and arrest activity associated with each of these offenses. Section five provides summary data on domestic violence incidents committed in Missouri and identifies relationships between domestic violence victims and offenders. The sixth section provides summary data on Crime Index offenses and arrest activity for specific political subdivisions in the State. Sections seven and eight provide summary data on law enforcement officers killed and assaulted while on duty. Section nine provides uniform and civilian employment information for Missouri law enforcement agencies. Section ten provides data on law enforcement employees as well as the number of assaults on sworn personnel for specific political subdivisions in the State

Prior to 2001, data in this Digest were provided on a voluntary basis by Missouri law enforcement agencies to the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting (UCR) Program. In 2001, state statute RSMo 43.505 was enacted requiring Missouri law enforcement agencies to report their UCR crime statistics to the Missouri UCR Program administered by the Missouri State Highway Patrol.

Eight offenses make up the Crime Index. They are:

- *Murder*

- *Rape*

- *Robbery*

- *Aggravated Assault*

- *Burglary*

- *Theft*

- *Motor Vehicle Theft*

- *Arson*

Increases in crime activity may reflect the transition from a voluntary to mandatory UCR Program. Care is warranted when directly comparing crime statistics since 2001 to previous years for this reason.

The national UCR Program was initiated in 1930 by the Committee on Uniform Crime Reports of the International Association of Chiefs of Police (IACP). This committee developed uniform offense and arrest classifications as well as reporting procedures which could be used by law enforcement agencies throughout the nation. The FBI was designated to administer the Program and became the national clearinghouse for UCR data. The Committee on Uniform Crime Reports of the IACP continues to serve the national Program in an advisory capacity. In 1966, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body for this program and to promote reporting to the UCR Program.

Crime and arrest data are, for the most part, collected on a monthly basis by several methods in Missouri. The Missouri UCR Program provides report forms, tally sheets, and self-addressed envelopes to Missouri law enforcement agencies who complete and return them to the Program. Missouri city and county law enforcement agencies also have the option of reporting their crime activity on a Web-based UCR reporting application while State law enforcement agencies utilize an electronic spreadsheet to report their monthly crime activity. Data from all Missouri law enforcement agencies are moved to a central data repository maintained by the MSHP.

Data displays identifying specific political subdivision crime and arrest activity contain only activity reported to the UCR Program. It is important to note that statistics for a political subdivision include not only crime and arrest activity reported by a local law enforcement agency, but also crime and arrest activity reported by state agencies (e.g., MSHP, Department of Conservation, Water Patrol). No effort has been made to estimate individual law enforcement agency's crime and arrest activity.

Slight discrepancies may be found if comparisons are made with FBI UCR publications and this Digest covering the same subject matter for the State of Missouri. Although similar, estimation routines and rates per 100,000 population calculations for pre-2001 data used by the FBI are not the same as those in this Digest. Discrepancies also may be noted when examining actual reported figures. This is a result of updates having been made to UCR files between the time the FBI data were processed and the time the SAC analysis was performed. This report is merely a snap shot of crime summary data reported to the Missouri UCR Program. Law enforcement agencies continually update their

UCR data for a variety of reasons. For this reason, statistics in this report may be different than statistics obtained from other sources or reports.

1.0 MISSOURI CRIME CLOCK

The Missouri crime clocks summarize criminal activity in the State during 2006 in relation to time. From this perspective, an appreciation of the relative frequency of various criminal offenses can be obtained. The clocks should be viewed with care. They are designed to convey annual crime experience by showing the relative frequency of occurrence of the index offenses. This mode of display should not be taken to imply a regularity in the commission of crime. Rather they represent the annual ratio of crime to fixed time intervals.

2.0 MISSOURI CRIME INDEX COMPARISON ANALYSIS

A series of tables and figures summarizes crime index offenses committed in the State of Missouri. The purpose of these displays is to compare the various types of crime index offenses being committed according to their relative contribution to the crime index. In addition, crime index offense rates are displayed by geographic regions of the State, and over time, in order to identify trends.

[1] Prior to 2001, Missouri law enforcement agencies voluntarily reported crime index offense data. To account for non-reporting agencies, Crime Index Offense Rates for these years were based on mathematical estimates. In 2001, RSMo 43.505 mandated all Missouri law enforcement agencies to report crime index offense data to the Missouri Uniform Crime Reporting Program managed by the Missouri State Highway Patrol. For this reason, Crime Index Offense Rates for 2001 and later years are based on data reported by nearly 100% of Missouri law enforcement agencies. Users should keep in mind that transition from a voluntary to a mandatory crime reporting system may affect comparisons of 2001 and later year Crime Index Offense rates to prior years.

[2] Crime Index Offense Rates are computed on a per 100,000 population basis. See Glossary for explanation of computations used to obtain these rates.

[1] Prior to 2001, property index offense rates were based on estimated property index offenses in the State of Missouri. Property index offense rates are computed on a per 100,000 population basis. See Glossary for explanation of computations used to obtain these rates.

[2] Because the jurisdictional boundaries of reporting agencies do not coincide with county boundaries in some instances, the following counties were combined: (Clay/Platte/Jackson) and (Scott/New Madrid).

[3] Legend categories are based on quartiles of counties.

3.0 MISSOURI ARREST ANALYSIS

A series of tables and figures summarize Missouri crime index arrest clearance rates, actual arrest activity associated with crime index offenses, and arrest activity associated with all other classes of criminal activity reported to the UCR Program. The purpose of these displays is to provide an overview of criminal enforcement activity being performed in the State by class of crime. In addition, arrest rates are displayed over time in order to observe trends.

[1]Prior to 2001, Missouri law enforcement agencies voluntarily reported crime index arrest data. To account for non-reporting agencies, Crime Index arrests for these years were based on mathematical estimates. In 2001, RSMo 43.505 mandated all Missouri law enforcement agencies to report crime index arrest data to the Missouri Uniform Crime Reporting Program managed by the Missouri State Highway Patrol. For this reason, 2001 and later year Crime Index arrests are based on data reported by nearly 100% of Missouri law enforcement agencies. Users should keep in mind the transition from a voluntary to a mandatory crime reporting system may affect comparisons of 2001 and later year Crime Index Arrests to prior years.

♦ *7,551 robberies were reported in 2006.*

♦ *One robbery occurred every 1.2 hours.*

6.0 MISSOURI LAW ENFORCEMENT AGENCY CRIME AND ARREST ANALYSIS

A series of tables summarizes crime index offenses and arrest activity associated with law enforcement jurisdictions in the State of Missouri. These data displays provide an overview of the extent of the crime problem within Missouri communities.

Population figures in this section are estimates based on the last census taken by the U.S. Census Bureau and represent the population associated with the reporting agency's jurisdiction. For rural counties, the figures represent the jurisdiction normally covered by sheriff's departments and/or county police departments. These population figures are computed by subtracting the population of all incorporated municipalities within a county having their own law enforcement agencies from the total population of the county.

6.1 MISSOURI POLITICAL SUBDIVISION INDEX CRIME ANALYSIS

A series of tables summarizes 2006 crime index offenses and arrests for all political subdivisions in Missouri. These tables display statistics for each index crime and rates per 100,000 population. Index crime totals are also provided for all Missouri counties.

10.0 MISSOURI LAW ENFORCEMENT AGENCY EMPLOYMENT / ASSAULT ANALYSIS

A series of tables summarizes the number of law enforcement employees, as well as assaults on sworn personnel associated with law enforcement jurisdictions reporting to Missouri's Uniform Crime Reporting Program. Data displays provide an overview of law enforcement personnel resources and the problem of officer assaults within Missouri communities.

10.0 MISSOURI LAW ENFORCEMENT AGENCY EMPLOYMENT / ASSAULT ANALYSIS

2005 Summary

♦ *In 2005, there were 12,218 full-time officers in Missouri.*

♦ *64.0% of the full-time officers work for municipal police departments, 24.0% work for county sheriff departments, 11.1% work for state agencies, and 1.5% work for colleges / universities police departments.*

Officer assaults are defined as the unlawful attack by a person on a law enforcement officer in the performance of his / her duty. Officer assaults include those which result in serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers beyond mere verbal abuse or minor resistance to an arrest. Assaults resulting in the death of a law enforcement officer are not included, but can be found in Section 7.0 of this report.

Employment information reflects a count of full-time sworn officers with full arrest powers and civilian employees the agency has on its payroll as of October 31 of each reporting year. It does not include part-time employees or auxiliary officers.

Population figures in this section are estimates based on the last census taken by the U.S. Census Bureau and represent the population associated with the reporting agency's jurisdiction. For rural counties, the figures represent the jurisdiction normally covered by sheriff's departments and/or county police departments. These population figures are computed by subtracting the population of all incorporated municipalities within a county having their own law enforcement agencies from the total population of the county.

GLOSSARY

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants and arrests in connection with negligent manslaughter in traffic accidents, are not scored. Included are those persons arrested but released without being formally charged.

ASSAULT: Officer assaults are defined as any unlawful attack by a person on a law enforcement officer who is in the performance of his / her duty. Officer assaults include those which result in serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers that were beyond mere verbal abuse or minor resistance to an arrest.

ASSAULTS PER 100 OFFICERS RATE: This rate is an indicator of reported officer assault activity standardized by the number of officers employed by the agencies reporting the activity. The officer assault rate formula is:

$$\frac{\text{Number of Officer Assaults X 100}}{\text{Number of Law Enforcement Officers Employed}}$$

Prior to 2001, assaults per 100 officers were based on estimates from data of agencies reporting a full 12 months of officer assault activity. Since 2001, this rate is based on officer assault activity reported to the Missouri UCR Program.

ASSIGNMENT: These categories identify the specific assignment of an officer at the time of the assault. Two-Man Vehicle and One-Man Vehicle pertain to uniformed officers on patrol. Special Assignment pertains to those non-uniformed officers functioning as detectives or on special assignment. Other Assignment pertains to those officers assaulted while functioning in some other capacity, such as foot patrol, off-duty, etc. The term "assisted" refers to law enforcement assistance only.

CLEARANCE: The resolution of a criminal offense or an assault on an officer by the arrest, charging, and turning over to the court for prosecution one or more persons alleged to have committed a crime or assault on an officer. An offense also can be cleared by exceptional means when the law enforcement agency has: 1) established the identity of the offender, 2) has enough information to support an arrest, charge, and prosecution in court, 3) the exact location of the offender is known so that he / she could be taken into custody, and 4) there is some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender, (ex., offender dies).

CLEARED OFFENSES ONLY JUVENILES: The number of clearances for an offense in which only juveniles were arrested or were identified as the offender but, for some valid reason, could not be arrested divided by the total number of clearances for that offense expressed as a percentage. The formula is:

$$\frac{\text{Number of Offenses Cleared Involving Only Juveniles}}{\text{Number of Clearances}} \times 100$$

CLEARANCE RATE (Assault on an Officer): The number of clearances divided by the total number of assaults, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Assaults}} \times 100$$

CLEARANCE RATES (Offenses): The number of clearances divided by the total number of offenses, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100$$

CRIME INDEX: The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. They were selected because of their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. Definitions of each of the offenses making up the Crime Index are provided in the section entitled "Missouri Detail Crime Index Analysis". In addition, refer to Crime Index Offense in this section for an explanation of how each type of offense is reported to the UCR Program.

CRIME INDEX OFFENSE: In the UCR Program, the offenses of murder, forcible rape, and aggravated assault are crimes against persons. For these crimes, one offense is counted for each victim. Robbery, burglary, theft, motor vehicle theft, and arson are crimes against property. For these crimes, with the exception of motor vehicle theft, one offense is counted for each distinct operation. In the case of motor vehicle theft, one offense is counted for each stolen vehicle.

CRIME INDEX OFFENSE ESTIMATES: Estimation routines were used in the Digest to identify the actual number of index crimes occurring in the State on an annual basis. They are designed to compensate for non-reporting and incomplete reporting of such offenses by Missouri law enforcement agencies. The following procedures and formulas were used to obtain statewide crime index offense estimates:

- Law enforcement agencies in the State of Missouri were categorized into Groups. The following categories were used:

    Municipal agency - 250,000 and over
    Municipal agency - population 100,000 - 249,999
    Municipal agency - population 50,000 - 99,999

Municipal agency - population 25,000 - 49,999
Municipal agency - population 10,000 - 24,999
Municipal agency - population 2,500 - 9,999
Municipal agency - population under 2,500
Rural Sheriff's Department
Suburban Sheriff's Department and County Police

- For those law enforcement agencies within a group reporting six months or more, a yearly estimate of their crime index offenses was obtained using the following formula:

$$\frac{\text{Crime Index Offenses Reported}}{\text{No. of Months Reported}} \quad X \quad 12 \quad = \quad \begin{array}{c}\text{Yearly} \\ \text{Crime Index} \\ \text{Offenses}\end{array}$$

- For each group, the yearly crime index offenses for all law enforcement agencies report ing six months or more and their jurisdiction's population were summed and the following group crime index rate was computed.

$$\frac{\text{Sum of Rpt. Agency's Yearly Crime Index Offenses}}{\text{Sum of Rpt. Agency's Population}} \quad = \quad \begin{array}{c}\text{Group} \\ \text{Crime Index} \\ \text{Rate}\end{array}$$

- For those law enforcement agencies reporting less than six months or no activity at all within a group, their yearly crime index offenses were computed using the following formula:

$$\begin{array}{c}\text{Law Enforcement Agency} \\ \text{Population}\end{array} \quad X \quad \begin{array}{c}\text{Group} \\ \text{Crime Index} \\ \text{Rate}\end{array} \quad = \quad \begin{array}{c}\text{Yearly} \\ \text{Crime Index} \\ \text{Offenses}\end{array}$$

- Yearly crime index offenses computed above for all Missouri law enforcement agencies were then summed in order to obtain a statewide yearly crime index offense estimate for use in this Digest.

No estimation routines were used in data displays identifying specific law enforcement agency's yearly crime activity in the Digest. In these data displays, only crime activity reported to the UCR Program is displayed.

EMPLOYMENT: The number of persons, either sworn officers with full arrest powers or civilians, working in a full-time capacity and appearing on the payroll of a Missouri law enforcement agency as of October 31 of a reporting year.

INDEX CRIMES: Index Crimes are the eight major offenses used to indicate the occurrence of crime in the United States. They were selected due to their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson.

INDEX CRIMES PER OFFICER RATE: This rate indicates the number of index crime incidents in a community in relation to the law enforcement agency's sworn officer resource availability. The formula is:

$$\frac{\text{Number of Index Crimes}}{\text{Number of Law Enforcement Officers Employed}}$$

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Juvenile arrests do not include law enforcement contacts with juveniles where no offense has been committed. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored since they have not committed any crime.

OFFICERS PER 1,000 POPULATION RATE: This rate is an indicator of a law enforcement agency's sworn officer resource availability in relation to the population of the community it serves. The formula is:

$$\frac{\text{Number of Officers Employed X 1,000}}{\text{Community Population}}$$

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \quad \text{X 100}$$

POPULATION: Total number of persons residing in a jurisdiction based on United States Census data.

QUARTILE: The value marking the boundary between two consecutive intervals in a frequency distribution of four intervals with each containing one quarter of the total population.

RATE PER 100,000 POPULATION: Rates per 100,000 population are indicators of activity standardized by the population of those law enforcement agencies associated with the activity. Three types of rates are provided: statewide crime index offense rates, reporting agency crime index offense rates, and arrest rates.

The statewide offense rate formula is:

$$\frac{\text{Number of Offenses Reported x 100,000}}{\text{Population of all Agencies Reporting}}$$

The reporting agency offense rate formula is:

$$\frac{\text{Number of Offenses Reported} \times 100{,}000}{\text{Population of Reporting Agency(ies)}}$$

The arrest rate formula is:

$$\frac{\text{Number of Arrests Reported} \times 100{,}000}{\text{Population of Reporting Agency(ies)}}$$

STRONG ARMED ROBBERY: A robbery wherein no weapons were used but tactics (limited to the use of personal weapons such as hands, arms, feet, fists, teeth, etc.) were employed to deprive the victim of his / her property.

TIME SERIES: Time-series analysis was used in the Digest to forecast future crime and arrest activity. With this technique, data for past periods were used as the basis for projecting levels of future activity. Ten years of past data were used to make these projections.

Crime and arrest rates on a per 100,000 population basis were used in making the forecasts. These rates reflect crime and arrest activity in relation to population.

The technique used to project crime and arrest activity was Exponential Smoothing (available through the SAS Econometrics and Time Series software package). Use of this technique took into consideration the limited number of data points in the time series, as well as whether or not the time series was best characterized as constant, linear, or non-linear. In applying the smoothing technique, greater weight was given to the more recent data values than to the earlier data values when projecting future levels of activity.
